To Whom it May Concern,

I would like to recommend Erika Ergart as a candidate for a position with your organization. Erika has extensively collaborated in a team project for the capstone project with our national home remodeling organization. Throughout her time with our organization, she demonstrated tenacity and curiosity necessary to solve high-level problems and would be a great asset at your company.

Erika has a terrific work ethic and leadership skills, recognizing the strengths of each of her teammate and motivating them to achieve their maximum potential during the period of the project. On top of her soft skills, Erika heavily contributed to writing Python code for feature engineering to further improve the accuracy of the models her and her team experimented with. Feature engineering requires keeping up with the current trends in Data Science and creativity necessary for achieving desired results.

Even though more often than not Erika's schedule is highly packed with classes, extracurricular activities and managing part-time jobs, she was always willing to offer her assistance to her teammates, ensuring the successful completion of the INFORMS presentation and papers. Such effective communication skills would offer any company more efficient workflow and faster income generation. Erika would be an asset to any employer and I wholeheartedly recommend her for any endeavor she chooses to pursue. Please let me know if you have any further questions.

Sincerely,

Anand Deshmukh
Mentor, Lead Data Analyst
